← Problems / Installation of a Shopee Billboard

## Installation of a Shopee Billboard

Max. score: 100

You are installing a billboard and want it to be at the maximum height. The billboard will have two steel supports, one on each side. The height of each steel bracket must be equal.

You have a number of rebar rods that can be welded together. For example, if the bars are of length *1, 2,* and *3*, they can be welded together to form a length of *6* brackets.

Return the maximum possible installation height of the billboard. Return 0 if the billboard cannot be installed.

SAMPLE INPUT

```
4
1 2 3 6
```

SAMPLE OUTPUT

```
6
```

**Explanation**

input: *[1, 2, 3, 6]*

output : *6*

Explanation : We have two disjoint subsets *{1, 2, 3}* and *{6}* with the same sum

*sum = 6 .*

| | |
|---|---|
| **Time Limit:** | 1.0 sec(s) for each input file. |
| **Memory Limit:** | 256 MB |
| **Source Limit:** | 1024 KB |
| **Marking Scheme:** | Score is assigned when all the testcases pass. |
| **Allowed Languages:** | Bash, C, C++, C++14, C++17, Clojure, C#, D, Erlang, F#, Go, Groovy, Haskell, Java, Java 8, Java 14, JavaScript(Rhino), JavaScript(Node.js), Julia, Kotlin, Lisp, Lisp (SBCL), Lua, Objective-C, OCaml, Octave, Pascal, Perl, PHP, Python, Python 3, Python 3.8, Racket, Ruby, Rust, Scala, Swift-4.1, Swift, TypeScript, Visual Basic |

## CODE EDITOR

Save C (gcc 10.3)

```
1   /*
2   // Sample code to perform I/O:
3   #include <stdio.h>
4
5   int main(){
6       int num;
```

```
7       scanf("%d", &num);          //Reading input from STDIN
8       printf("Input Number is %d.\n", num);       //Writing output to STDOUT
9   }
10
11  // Warning: Printing unwanted or ill-formatted data to output will cause the test cases to fail
12  */
13
14  // Write your code here
15
```
